# CYPERFOS 500 EC

## ○ PRODUCT POSITIONING

An emulsifiable concentrate (EC) contact and stomach insecticide for the control of various pests on crops as indicated.

## ○ UNIQUE CHARACTERISTICS

- Cyperfos 500 EC is a unique formulation which comprises of a combination of two well-known active ingredients, Chlorpyrifos and Cypermethrin. This combination has a strong synergistic action.
- Cyperfos 500 EC is a rapid-acting broad spectrum insecticide with a contact, stomach and anti-feeding action against problem insects.
- The volatile action of Chlorpyrifos controls insects that are difficult to reach inside dense foliage. In conjunction with the outstanding residual action of Cypermethrin it delivers excellent results as well as a rapid knock-out action.
- Cyperfos 500 EC consists of a combination of two active ingredients ideal for use in an anti-resistance programme by offering more than one mode of action.
- Cyperfos 500 EC has been tested in Africa under extreme environmental conditions to ensure crop safety and effective control.

Crop and Pest	Dosage / 100ℓ water or as indicated	Remarks
MACADAMIAS Stinkbug complex Two-spotted stinkbug ( <i>Bathycorhiza natalicola</i> )	105mℓ	Apply after flowering stage as a medium to full cover spray when the pest is noticed. Repeat every 4-6 weeks if necessary, but do not exceed more than 4 applications.

Cyperfos 500 EC Reg. No. L7606, Act No. 36 of 1947

Cyperfos 500 EC contains: Chlorpyrifos (Organophosphate), Cypermethrin (Pyrethroid) (HARMFUL)

## ○ PRODUK POSISIONERING

'n Emulgeerbare konsentraat (EC) kontak- en maag-insekdoder vir die beheer van verskeie plae op gewasse soos aangedui.

## ○ UNIEKE EIENSKAPPE

- Cyperfos 500 EC is 'n unieke formulاسie wat 'n kombinasie van twee bekende aktiewe bestanddele naamlik, Chloorpirifos en Sipermetrien is. Hierdie kombinasie toon 'n sterk sinergistiese werking.
- Cyperfos 500 EC is 'n vinnig werkende breëspektrum insekdoder wat 'n kontak-, maag- en antivoedingsaksie teen problematiese insekte bied.
- Chloorpirifos se gasaksie beheer moeilik bereikbare insekte in digte plantegroei wat in samewerking met Sipermetrien se goeie residuele langtermynbeheer uitstekende resultate met 'n vinnige uitklopaksie lewer.
- Cyperfos 500 EC bestaan uit 'n kombinasie van twee aktiewe bestanddele wat ideaal in 'n antiweerstandsprogram gebruik kan word deur meer as een metode van werking te bied.
- Cyperfos 500 EC is in Afrika onder ekstreme omgewingstoestande getoets om gewasveiligheid en effektiewe beheer te verseker.

Gewas en Plaa	Dosis / 100ℓ water of soos aangedui	Opmerkings
MAKADAMIAS Stinkbesie kompleks Tweekolstinkbesie ( <i>Bathycoelia natalicola</i> )	105mℓ	Dien na blomtyd toe as 'n medium tot voldekbepuiting tydens die eerste verskyning van die plaa. Herhaal elke 4-6 weke indien nodig, maar moenie meer as 4 toedienings oorskry nie.

Cyperfos 500 EC Reg. Nr. L7606, Wet Nr. 36 van 1947

Cyperfos 500 EC bevat: Chloorpirifos (Organofosfaat), Sipermetrien (Piretroïed) (SKADELIK)
